EDUCATION

University of New South Wales 2023 - Present

WAM: 82.107

Majors: Computer Science, Finance

Relevant Courses (85+): Web Front-End Programming, Computer Systems Fundamentals, Solving Modern Programming Problems with Rust, Computer Science Project, Human Computer Interaction

WORK EXPERIENCE

Casual Academic Sep 2024 – Present

University of New South Wales Kensington, NSW, Australia

- Delivered tutorials and labs to approximately 25 students for core and elective Computer Science courses
- Achieved ~40% higher student satisfaction than the School and Faculty teaching with a mean rating of 5.55/6
- Facilitated labs, help sessions and online forums, increasing student participation in learning
- Assessed student performance by marked 200+ assignments and exams and invigilated 20+ course exams

Student Consultant Jan 2026 – Feb 2026

Woolworths International Group Hong Kong, SAR

- Analysed the end-to-end New Product Development workflow to identify key operational inefficiencies
- Delivered 2 AI-driven solutions forecasted to improve monthly productivity by 3–10% through automating global sourcing processes and enabling data driven decision making
- Developed an agentic AI solution to automate insights generation and improve pre-launch product evaluation
- Developed an omnichannel communication platform to streamline stakeholder collaboration across teams
- Collaborated in an international team to challenge existing frameworks and present actionable strategies

PROJECTS

Jamlife Jun 2026 – Aug 2026

- Engineered a mobile app using React Native, Expo and Firebase, to help women better understand their emotional and physiological state
- Implemented LLM integration for user health data analysis, personalised recommendations, and conversational wellbeing companion
- Implemented Apple HealthKit integration for dashboard display of biometrics including HRV and sleep

UNSW Mending Broken Hearts Feb 2025 – Dec 2025

- Achieved overall 1st place in the Heart Hackathon, a global total artificial heart design competition
- Engineered a cross-platform patient mobile app using React Native, Expo and Firebase, to support patient health management and real time total artificial heart monitoring
- Developed a clinician desktop interface using React.js, Vite and Firebase, to enable real time data monitoring of the total artificial heart and visualisation of patient vitals
- Designed, built and deployed the general team's website using React.js and Vite

ACTIVITIES

FXA Vice President of Technicals (2025-26), FXA IT Director (2025), FinTech IT Director (2025), Arc Wellness Warriors (2024-25), CSESoc Peer Mentor (2024T1), CSESoc Marketing Subcommittee (2023)

SKILLS

Programming Languages: C, MIPS Assembly, SQL, Python, Rust, JavaScript, TypeScript

Frameworks & Tools: React (.js & Native), Expo, Vite, GitLab/GitHub

Databases: Firebase, PostgreSQL
